

After School Activities 2025/2026

Primary Dutch Bilingual

Dear parents/ guardians,

We have been working hard on the after school activities program for the new school year, and we are happy to share our program for the first cycle with you. We have added boxing to the program this cycle (the judo instructor is unfortunately no longer available, but hopefully boxing is a nice alternative for our students).

On the next pages you can find the schedule for and a description of the After School Activities for the first cycle, which runs from **Monday September 22 to Friday January 30** (catch up lessons in the last two weeks before the Carnival Break). On study days there will be no activities.

On Monday, Tuesday, Thursday and Friday, students go straight to their activity after school. They may bring a snack to eat at the start of the activity. On Wednesday we will organize lunch supervision for all students who are going to after school activities. The children can bring a packed lunch then. Children who go to BSO on Wednesdays, will have lunch at the BSO before going to their activity. These students don't need to bring a packed lunch.

If your child goes to the BSO, please inform the BSO of your child's after school activities. We expect you to pick up your child on time after the activity. At the end of the activity, you are responsible for the safety of your child. Children who go to BSO will be brought to the BSO after the activity.

Make sure you check the age groups the activity is for, so you sign your child up for the right activities. Please note: once you have signed up your child for an activity, it is not possible to cancel the activity anymore for this cycle.

For parents who also wish to sign up their children for home language classes: you will receive this information separately from our home languages coordinator (Elise van Holst). Make sure you don't sign up your child for other after school activities on the same day as the home language class. The home languages classes will take place on the following days & times: **Turkish** (Monday 15:30 – 16:45), **Spanish** (Tuesday 15:30 – 16:30), **Greek** (Wednesday 13:00 – 14:00), **Mandarin** (Friday 15:30 – 16:30), **Portuguese** (day to be determined with the parents who are interested). Maybe other languages will be offered as well. Several home language teachers are also available for lessons at our location, depending on demand. You will receive this information from the home languages coordinator, and you can let her know if you are interested in these lessons for your child(ren).

Regards from the Primary Dutch Bilingual Team

ASA Schedule 1st cycle 2025/2026

Monday (14 sessions)

Buddies Book Worms	5 - 8	15:30 – 16:30	€105	Library

Description of activities

Art	Being creative is more than being able to draw. It's the way you see the world, the way you think and the way you solve problems. You don't need to be able to draw or paint to join the art classes, you just have to be ready to have a good time experimenting with different techniques and mediums.
Boxing and self defense	On Tuesday we have added a new sport for the older students, throwing punches on bags and other skills to defend yourself will be taught here!
Buddies Book Worms	Do you love reading? Books about adventures, funny stories, friendship or mystery? Then join our lovely Miss Bridget after school in the Library Book Club. We will spend time each week reading and talking together about books, authors, exploring the library and sharing what you like to read. With a cup of tea, great discussions and wonderful books. <i>*This activity is only available in English</i>
Chess	Playing Chess will help you to develop your brain in ways no other activity does! It is fun and challenging!
Dance Adventure	Young children enjoy dancing and playing games. The lovely Miss Sian organizes a fun after school activity for our younger students, in which the children will play games and dance different styles of dance all mixed together. They will have so much fun together!
Dance (hip-hop & jazz)	Who comes to dance to modern music after school. The teacher teaches us real cool moves!!
Little Engineers Academy	Designed for curious, creative children with problem-solving skills, the Little Engineers Academy Club Class aims to nurture them as individuals who do not just consume technology but also create it. In our classes, children acquire fundamental skills in science, technology, engineering, and mathematics (STEM) while also building self-confidence through hands-on projects. Your children will learn engineering principles by constructing their own robots, creating animations, and exploring future technologies. This club offers a unique opportunity for them to learn while having fun, developing their creativity and social skills. Additionally, during the course, your children's talents will be analyzed, and parents will receive a detailed analysis report highlighting their children's abilities. This report will provide insights into which areas your children excel in and what future opportunities might be best suited to their strengths. Join us in this exciting journey for your children!
Mad Science	Mad Science has created a vast library of unique after school programs. Our spectacular demonstrations, hands-on activities, and real world discussions make learning about science fun for kids! Our interactive, one-hour after school science programs are themed around particular areas of science and include such topics as rocketry, magnets, polymers, and even the science of toys. This is science like you've never experienced before!
Primary Dutch Bilingual School Band	Have you ever dreamed of singing or playing in a real band? Mr. Lennert is a real songwriter, producer and band coach. He teaches our students to play different instruments, but most of all how much fun it is to make music together. Come join our very cool school band!
WildWoozt	Super exciting activities for all students. They are going to play games from laser game to archery shooting outdoor (indoor in case of very bad weather). It's a great way to explore and improve motor skills and really learn to enjoy outdoor playing. As the students will play outdoors, it's essential that students wear clothes which can get a bit dirty.
Yoga	Children's yoga is a mix of yoga poses, concentration exercises, breathing games, children's massage, yoga games and creative skills. Dynamics and relaxation alternate. Yoga is not about competition or achievement. There are no winners or losers, no right or wrong. You can be who you are. This leads to self-confidence and self-esteem.
