

# After School Activities 2025/2026 - 2<sup>nd</sup> Cycle

## Primary Dutch Bilingual

Dear parents/ guardians,

With this letter we would like to inform you about the second cycle of After School Activities this school year. On the next pages you can find the schedule for and a description of the After School Activities for the second cycle, which runs from **Monday February 23** to **Friday June 26** (catch up lessons in the last two weeks before the Summer Break). On study days there will be no activities.

On Monday, Tuesday, Thursday and Friday, students go straight to their activity after school. They may bring a snack to eat at the start of the activity. On Wednesday we organize lunch supervision for all students who are going to after school activities. The children can bring a packed lunch then. Children who go to BSO on Wednesdays, will have lunch at the BSO before going to their activity. These students don't need to bring a packed lunch.

If your child goes to the BSO, please inform the BSO of your child's after school activities. We expect you to pick up your child on time after the activity. At the end of the activity, you are responsible for the safety of your child. Children who go to BSO will be sent to the BSO after the activity. Make sure you check the age groups the activity is for, so you sign your child up for the right activities. Please note: **once you have signed up your child for an activity, it is not possible to cancel the activity anymore for this cycle.**

If your child is also taking home language classes, make sure you don't sign up your child for other after school activities on the same day as the home language class. The home languages classes take place on the following days & times: Turkish (Monday 15:30 – 16:45), Spanish (Tuesday, 15:30 – 16:30), Greek (Wednesday 13:00 – 14:00). Parents, you can always let us know if you are interested in home language classes for your child(ren). If we have a small group of children with the same home language, we will try to find a home language teacher.

Regards from the Primary Dutch Bilingual Team

## ASA Schedule 2<sup>nd</sup> cycle 2025/2026

<b>Monday</b> (13 sessions)

## Description of activities

<b>Art</b>	Art is an exciting and creative way for children to explore their imagination while developing important skills. Through hands on activities, kids build confidence, improve fine motor skills, and learn to express their ideas visually. In our <b>new</b> art lessons, students will enjoy a variety of creative experiences including drawing, painting, papier-mâché, sculpting, street art, and collage. These activities will be thoughtfully combined with art history, helping children discover famous artists, styles, and cultures while creating their own unique artwork. This approach makes learning fun, inspiring, and meaningful for every young artist.
<b>Boxing and self defense</b>	Throwing punches on bags and other skills to defend yourself will be taught here!
<b>Buddies Book Worms</b>	Do you love reading? Books about adventures, funny stories, friendship or mystery? Then join our lovely Miss Bridget after school in the Library Book Club. We will spend time each week reading and talking together about books, authors, exploring the library and sharing what you like to read. With a cup of tea, great discussions and wonderful books. <i>*This activity is only available in English</i>
<b>Chess</b>	Playing Chess will help you to develop your brain in ways no other activity does! It is fun and challenging!
<b>Dance &amp; Music</b>	Do you love music and dancing? Come sing, move and play with us, and discover your inner performer! Through singing and dancing we explore music together in a fun and creative way. Join juf Eline from De Muziekfabriek for this wonderful musical journey!
<b>Dance (hip-hop &amp; jazz)</b>	Who comes to dance to modern music after school? The teacher teaches us real cool moves!!
<b>Little Engineers Academy</b>	Designed for curious, creative children with problem-solving skills, the Little Engineers Academy Club Class aims to nurture them as individuals who do not just consume technology but also create it. In our classes, children acquire fundamental skills in science, technology, engineering, and mathematics (STEM) while also building self-confidence through hands-on projects. Your children will learn engineering principles by constructing their own robots, creating animations, and exploring future technologies. This club offers a unique opportunity for them to learn while having fun, developing their creativity and social skills. Additionally, during the course, your children's talents will be analyzed, and parents will receive a detailed analysis report highlighting their children's abilities. This report will provide insights into which areas your children excel in and what future opportunities might be best suited to their strengths. Join us in this exciting journey for your children!
<b>Mad Science</b>	Mad Science has created a vast library of unique after school programs. Our spectacular demonstrations, hands-on activities, and real world discussions make learning about science fun for kids! Our interactive, one-hour after school science programs are themed around particular areas of science and include such topics as rocketry, magnets, polymers, and even the science of toys. This is science like you've never experienced before!
<b>PDB School Band</b>	Have you ever dreamed of singing or playing in a real band? Mr. Lennert is a real songwriter, producer and band coach. He teaches our students to play different instruments, but most of all how much fun it is to make music together. Come join our very cool school band!
<b>WildWoozt</b>	Super exciting activities for all students. They are going to play games from laser game to archery shooting outdoor (indoor in case of very bad weather). It's a great way to explore and improve motor skills and really learn to enjoy outdoor playing. As the students will play outdoors, it's essential that students wear clothes which can get a bit dirty.

<b>Yoga</b>	Children's yoga is a mix of yoga poses, concentration exercises, breathing games, children's massage, yoga games and creative skills. Dynamics and relaxation alternate. Yoga is not about competition or achievement. There are no winners or losers, no right or wrong. You can be who you are. This leads to self-confidence and self-esteem.
